

- **Environment Agency** national environmental regulatory body in England.
- **Catchments** - scale at which land and water interact, complex systems.
- **Catchment management** - function of connections between sectors, stakeholders, researchers, policy makers and practitioners (evidence based practice - practice based evidence):
 - *Public sector* - “where are the policy levers and intervention points in this system?”
 - *Private sector* - “where are the opportunities to create and add value in system?”
 - *Civil society sector* - “with whom and how should we be collaborating?”
- **I-CONN** and **Environment Agency** investigating connectivity in catchments as complex systems and how to improve catchment system resilience in a VUCA (volatile, uncertain, complex and ambiguous) time.
